

MAGNUS S SERIES

Breather filter for reservoirs and gearboxes.

FEATURES

Desiccant filter for gearboxes from 700 to 1500 liters capacity or hydraulic systems with variable volume up to 1000 liters.

A large silica gel chamber ensures the dryness of the air entering your equipment. The filter material for solid particles up to 3 microns is capable of excluding the environmental dust typical of many industries.

APPLICATIONS

General applications in slightly humid environments or where with low air exchange.

Model	S 100	S 200	S 350	S 500	S 750	S 1000
Diameter (mm.)	58	75	75	85	85	120
Total diameter (mm.)	65	90	90	98	98	140
Height (mm.)	70	100	180	120	170	220
Silica gel (cc.)	100	200	300	500	750	1000
Solids filter (Microns)	3	3	3	3	3	3
Maximum Flow (CFM)	5	5	5	15	15	15
Water absorption cap (cc)	45	95	150	220	320	450
Connections	3/4" NPT			1" - 1,5"
