

# MAGNUS S+ SERIES

Breather filter for wet areas.

## FEATURES

The S+ series offers the same features as the S series, but adding 2 check valves that limit the air flow until the pressure exceeds 0.2 PSI. In this way, the absorbent material is kept isolated and protected from ambient humidity.

This series is recommended for areas where the ambient humidity exceeds 70%, such as the coast, tropical areas or industries where there is a lot of steam.

## APPLICATIONS

Reservoirs, hydraulic systems and gearboxes operating in high humidity environments.

Modelo	S+ 200	S+ 350	S+ 500	S+ 750	S+ 1000
Diameter(mm.)	75	75	85	85	120
Total diameter (mm.)	90	90	98	98	140
Height (mm.)	100	180	120	170	220
Silica gel (cc.)	200	300	500	750	1000
Solid filter (Micras)	3	3	3	3	3
Maximum flow(CFM)	5	5	15	15	15
Water absorption (cc)	95	150	220	320	450
Conections	$\frac{3}{4}$ "		1" - 1,5" Male or Female
